

Redjack for Consulting Partners

Empower your services with always-on asset discovery, real-time dependency mapping, and resilience scoring – plus AI-powered business-function alignment

The Challenge for Consulting Firms

To deliver results, your teams need to understand:

- What IT assets does your client have
- How those assets connect and depend on each other
- Which systems matter most to the business
- What risks lie beneath the surface

But the reality is:

- CMDBs are often incomplete or outdated
- Discovery is slow, manual, or disruptive
- Dependencies are undocumented
- OT, IoT, and third-party connections are frequently invisible

Our Solution

We provide a drop-in capability that powers your assessments and implementations with:

- Passive asset discovery (IT, OT, IOT, THIRD-PARTY) – based on observed communications, no scans or agents
- Automated dependency mapping – across on-premises, cloud, and hybrid environments
- AI-powered business-function alignment – know which assets power which parts of the business
- Criticality and resilience scoring – based on business impact
- Continuously updated data – no more guesswork or stale inventories

How We Support Your Services

Cybersecurity

Continuous attack surface visibility, business-focused risk scoring, pre-engagement discovery

Business Continuity

BIA inputs, recovery tiering, dependency analysis, critical system mapping

Operational Resilience

Automated IT recovery plans, business function alignment, risk identification

IT Modernization

Baseline inventories, CMDB validation, mapping legacy dependencies

Regulatory Compliance

Evidence of control coverage, visibility across zones

Why Partner With Us

- Win more engagements by offering faster, deeper insight with business-focused dashboards and reporting
- Stand out with a tech-enabled approach to risk and resilience
- Accelerate the delivery of asset- or dependency-driven workstreams
- Upsell high-value services
(E.G., RESILIENCE SCORECARD, POST-QUANTUM READINESS)
- Use in assessments or managed service offerings
