Redjack for Technology Partners

Empower your platform with always-on asset discovery, real-time dependency mapping, and cyber resilience scoring – plus AI-powered business-function alignment

Complete, Continuous, Business-Focused Visibility. Seamless Integration.

- Discover all IT, OT, IoT, and third-party assets— passively and continuously
- Automatically map asset dependencies and link them to business functions
- Feed clean, real-time, business-focused infrastructure data into your platform

Common Use Cases We Power

Our capabilities are best suited for large enterprises with complex IT environments. Redjack asset and dependency data helps with:

DR/BC Planning
Deep asset visibility plus live dependency and business function mapping, and AI-powered recovery plans to improve recovery workflows

Cybersecurity Enrichment
Real-time asset discovery and context to improve triage and investigations

GRC & Compliance Context
Visibility and context across asset types, validation of controls coverage

CMDB Data Accuracy
Automated discovery, improve data quality and relevance

Digital Transformation
Pre-migration assessment and impact analysis of data across environments

Ideal Partner Profiles

We work best with:

- DR/BC software providers
- Cybersecurity platforms
  (E.G., SIEM, SOAR, XDR, ENDPOINT, CAASM/ASM)
- GRC/Compliance solutions
- ITSM, CMDB, or observability tools
- Cloud migration & transformation firms

What Makes Us Unique

- Passive sensors – No scanning or agents required
- Real-time updates – Always-fresh asset data
  (IT, OT, IOT, AND THIRD-PARTY)
- Cross-domain visibility – On-premises, Cloud, Hybrid
- Automated dependency mapping – Based on observed behavior
- Business-function mapping – See what matters most
- Criticality & resilience scoring – Based on business impact
- Open integrations – Easy to embed or co-sell
- Visualizations – Graph views deliver clear picture of complex infrastructure

Partner Benefits

- Expand your platform's capabilities instantly
- Differentiate from competitors with deeper visibility and business insights
- Drive stickier deployments & larger deals
- Fast integration, flexible partnership models
  (OEM, CO-SELL, REFERRAL)
